THANK YOU FOR CREATING OPPORTUNITIES FOR OUR
COMMUNITY TO ENJOY THE BENEFITS OF GARDENING.

Simon's Giving Garden

Simon's Story

Simon L. Baker had a contagious smile, kind heart, and loved spending time with his family, friends, and dog, Harrison. His passions included: playing baseball, and basketball, photography, art and the beach. He attended Jupiter High School, where he excelled academically.

His adoring parents, Chris and Debby, and loving brother, Sam wish to honor Simon's memory at The Edna W. Runner Tutorial Center by creating a living garden, named Simon's Giving Garden, in honor of Simon's immense generosity and value he placed upon being a fun-loving and compassionate friend. This very special garden will include pollinator plants for butterflies and areas where students can reflect and grow.

SIMON'S GIVING GARDEN AT EDNA W. RUNNER TUTORIAL CENTER

The garden program at Edna W. Runner Tutorial Center will create a special learning environment to enrich the social-emotional learning for students K-8.

what we do

The Tutorial Center is a provider of after school, spring break and summer camp services for children in grades K-8 in western Jupiter, Florida. Our objective is to provide educational support, increase grade point average and self-esteem. We strive to help students develop interests, skill and knowledge in a variety of areas all within a safe, warm and nurturing environment.

adopting a program

When you adopt a program, whether it be gardening art or music, you connect with the children in our community in a critical way. Your dollars help provide critical supplies and instruction time that otherwise would likely not be available. Signing up is easy! Just fill out the form here or contact our office directly. Thank you!

GARDEN DESIGN

Educational Garden Design

Simon's Giving Garden was carefully designed to include perennial plants, butterfly plants and raised beds for wellness education. Features include an anti-bullying bench, pergola and outdoor classroom area. An automated watering system will support healthy plant growth. Raised beds will be ADA accessible.

Students will also be able to create personal gardens to bring home and share with their community.
